

PETER NEUCHS

Born in 1958 in Århus, Denmark
Lives and works in Rio de Janeiro, Brazil

Peter Neuchs's *œuvre* is a contemporary interpretation of the Baroque aspiration to unite terrestrial and celestial, visible and invisible – encompassing the temporal, the perishable and what pertains to eternity. His work is characterized by surfaces filled “all-over”. It is excessively stuffed with details, sensations, and feelings. The *memento mori*, a notion dear to Peter Neuchs, lies at the heart of his work : through a play on perception his blurry images interrogate our reality, our relation to matter, our existence as matter.
