

YOON JI-EUN

Born in 1982 in South Korea
Lives and works in Paris

Worlds within worlds within worlds...

Yoon Ji-Eun seeks to depict the many strata that constitute reality. Her artworks are superimpositions of scenes of everyday life - a metro platform, a woman hanging laundry to dry, children playing - and phantasmagoric landscapes that render the thoughts, memories or dreams of her characters.

Yoon Ji-Eun draws, paints, carves and sculpts, paper or wood, in order to bring life to time, place and action simultaneities. It's about visually transposing the density of an enlarged reality, a complex temporality where space, mind, body, matter, past and present are constantly interacting. In Yoon Ji-Eun's poetic universe, the mirage is as much reality as it is tangible materiality.
